Loop 12 Northbound Frontage Road Bridge Closes for Six Weeks

Motorists Traveling to Westbound SH 114 Must Use Detour

IRVING – The Loop 12 northbound frontage road bridge at SH 114 will be closed beginning Saturday, Sept. 10 through Oct. 21, 2011, to accommodate final construction of east & westbound frontage roads at Loop 12 & SH 114.

Beginning Saturday morning, traffic headed toward westbound SH 114 from northbound Loop 12 will be detoured. Motorists will take the existing exit to SH 114 from northbound Loop 12. At the frontage road intersection, motorists will turn right onto the eastbound SH 114 frontage road and enter the SH 114 continue to the Spur 482/Storey Lane entrance. This entrance ramp is a “double clover leaf” configuration and traffic will travel through it without stopping to the westbound SH 114 mainlanes.

This closure is necessary to ensure the safety of the traveling public and workers while the new frontage road intersection at Loop 12/SH 114 is being completed.

Portable message boards were placed in advance to inform the traveling public of the closure.

This is part of the \$224 million project to reconstruct the Loop 12/SH 114 interchange. The project began in February 2009 and is expected to be complete by early summer of 2012.

TxDOT appreciates the patience of motorists and encourages attention to all warning signs within the construction work zone while crews work diligently to complete this project as quickly and as safely as possible.
